Experts say why aircraft was shot down by a missile	2hours 50 mins video. Shows why experts believe it was shot down by a missile. A retired USA Admiral said it was shot down by a missile for sure but was not the Navy.	https://youtu.be/PN6GPOfXS8U Length of video 2 Hours and 50 minutes.
FBI said it was not a bomb or a missile	Former assistant director FBI. Comments from Youtube Watch the documentary "TWA Flight 800" and decide for yourself. I have no doubt that it was a (shameful) cover up. As someone else has said, watch the documentary. The evidence for a high-velocity, military-style ordinance exploding just outside the plane is overwhelming. And 200 witnesses on the ground (and in the air) described at least one missile leaving the ground and exploding right next to the plane. The witnesses are educated, ex-military, etc. and were threatened, in some cases, by the FBI to not repeat their stories. One woman, who was awaiting her naturalization papers to become a US citizen, was told by the FBI that her case could go south if she told what she'd seen. It is CRAZY. I don't know what could have happened that the government is determined to cover this up, but this isn't your garden	https://youtu.be/zRORWuTlyws Length of video 3 minutes.

	variety conspiracy theory. Watch the documentary and decide for yourself.
